

The Easy Clean doesn't take much space and can be kept inside or out

The Easy Clean

Introducing the

“Easy Clean”

An Easier Method with Less Mess and Odor

TARGET MARKET:

- A growing RV market of 10 million plus.
- Those that are tired of replacing the stinky rubber hoses up to twice a year.
- Class A, Pull trailer, 5th Wheel, Class C, Super C, or Camper

FEATURES:

- Easy to clean design as compared to flex hosing.
- Flexible, extendible tubing easily reaches RV Park sewage tanks.
- Come in easy to carry nylon mesh bag.

PATENT INFORMATION

A provisional patent application was filed in April of 2019. The Mars Rising Network performed the patent search and concluded there is nothing similar to this product on the market, which means this unique device could be patented and used everywhere.

SUMMARY

Ten million households own some kind of Recreational Vehicle. The vast majority uses the same ribbed flex hose to empty their RV's sewage. These hoses are dreadful to work with, mainly because they are difficult

to clean. This means they smell and are dirty. Additionally they can often break causing frequent replacement.

Introducing the **Easy Clean**! This system solves those issues with a system of easy to connect flexible tubing that attaches to RV's of any height with the many elbows and lengths of tubing. The main advantages are the two swivel elbows allowing for almost angle and the 9 feet of flexible tubing (3 x 36" lengths) that can bend.

Cleaning is a breeze. Simply put the end caps on the tubes, pour in some soap or Pinesol™, shake and rinse. No more hidden crevasses for crud to accumulate in. This allows for storage in the included mesh bag inside or outside of the RV. The bag with all of the necessary tubing fits in a 14" x 14" x 40" area.

Whether the RV is a Class A, Pull trailer, 5th Wheel, Class C, Super C, or Camper, if it has a sewer cleanout, the Easy Clean can be connected. The tubes twist together with a 90° elbow on the front end and can be purchased with or without the end going to the sewage tank.

Stop buying new flex hoses that crack and need to be replaced! The **Easy Clean** is more convenient and will last longer without the odor.

About the Developer

Craig Mecham of Mesquite, NV, like many other RV enthusiasts, knew what a hassle it is using the current solution for emptying the RV sewage. He knew that there must be a better way and came up with the Easy Clean and contacted the Mars Rising Network and had a provisional patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the system for a royalty.
