

Introducing the

Safety Nail Clippers

“The safest way to clip nails on a young child”

TARGET MARKET:

- Families with small children
- Great for elderly also

FEATURES:

- Color coded for different safety padding
- Padding distance is embossed on the front of each clipper

PATENT INFORMATION:

A patent application was filed in July of 2020 and is in patent pending status.

SUMMARY:

Being a parent means having to improvise when doing many tasks because sometimes there isn't a specific tool for the job. One of these tasks is clippers for children. Often parents may just use clippers made for adults but this can be scary if not done with utmost caution. A slight error in judgement and you can cause scream inducing pain.

Introducing the **Safety Nail Clippers**. These innovation clippers have a plastic buffer that separates the cutting edge from the child's

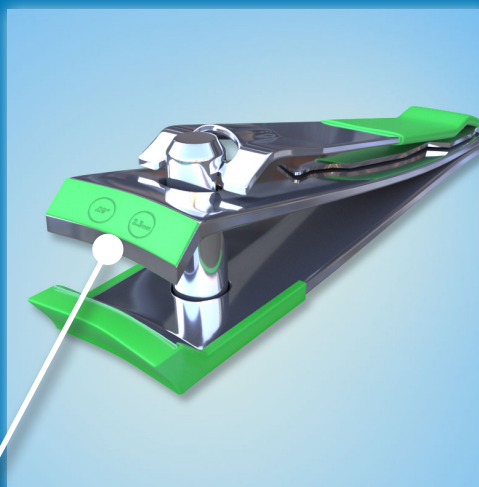

tender tissue underneath the nail. The clippers come as a set of different sizes for different margins of safety. You can use the biggest one and work your way down as you feel more comfortable.

The three sizes are differentiated by the different colors Green is the safest margin, followed by Yellow and then Magenta. The sizes are clearly embossed on the top front of each clipper in metric and US inches. They range from .8mm to 2.8mm.

Cutting fingernails on small children can now be a much more enjoyable and less stressful activity.

The Safety Nail Clippers also come in adult versions for fingernails and toenails with the same three levels of safety. This can be useful for clipping your own nails or someone else's. For example, the elderly relative or someone who is afraid to trim their own nails.

The Safety Nail Clippers will come in adult sizes, and toe nail clippers too. They will be worry free, and safe for clipping your own nails, or anyone else's.

Each clipper is color coded to quickly choose the safest margin

About the Developer

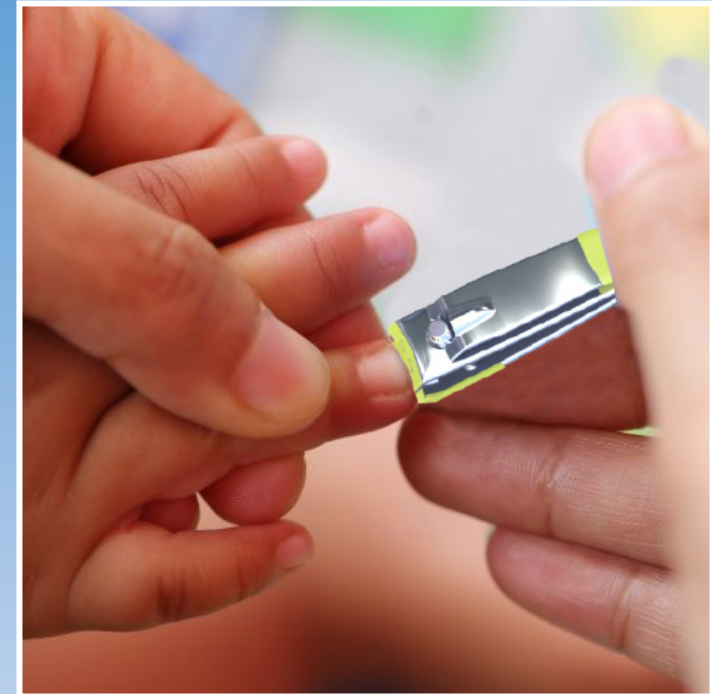

Archie Peterson of Anchorage, AK like most parents has horrible realization of what can happen if you might cut too close while clipping nails on a small child. So he set out to solve the problem and has worked out a very effective solution. Working with Mars Rising Network, he had the invention refined with the hope of turning this great idea into a commercial product. He is actively seeking a company that would have an interest in partnering with him to get this product on the market.
