## The Phone Charger Station

Introducing the

# Phone Charger Station

“A safe, easy way for people to charge their phones while they shop”

### TARGET MARKET:

- Businesses where consumers bring their phones.
- Bars, Taverns and Nightclubs where charging safety is a concern.

### FEATURES:

- Can charge any major phone or tablet.
- Option for a locked compartment.
- Easily pay with your phone for time.
- Takes up little space but can charge over 20 devices

### PATENT INFORMATION:

A patent application was filed in June of 2020 and is in patent pending status.

### SUMMARY:

A dilemma of our current times, our phone is losing its charge. Where can I charge my phone? We see it quite often, people searching for a place to recharge their phone. But it seems that power receptacles are becoming harder to find. And if you do find one, everyone else got there first!

Introducing the **Phone Charger Station**. A simple to use kiosk that can

be installed in stores, malls, bars, etc. Perfect for anywhere that people shop or hang out and need to charge their phone safely for awhile. Why stress out constantly looking to see if your phone is still there? And what if it isn't? Yikes!

The Phone Charger Station is simple to use. You simply pick an available port, choose a time interval and pay with your phone contactless mobile system. Done! Your phone will be charged when you return and put in your code to release it.

The phones are kept safe and cool with each compartment being locked and cooled by internal fans.

For businesses this is an easy way to bring in additional income and the Phone Charger Station can be located in a corner as it doesn't take up much space, about 2' x 2' feet.

The station has a shelf in addition to the locked compartments where devices can be charged a little less expensively for people that will be near the device or for place where it will be monitored by others.

Keep all of your devices safe while you charge with the **Phone Charger Station**.

**About the Developer**

Michael Tetu of Fallbrook, CA is an inventor with several products. His latest project came about to help solve the 'dying phone' syndrome. He came up with a solution and created a simple prototype and it proved quite effective. Working with Mars Rising Network, he had the invention refined with the hope of turning this great idea into a commercial product. He is actively seeking a company that would have an interest in partnering with him to get this product on the market.
