About the Developer

Michelle Puma Stevens of Sebring, FL noticed that many older and physically challenged friends have canes but that the designs are unappealing. Why not add some fun and variety to these canes. She came up with a solution and created a simple prototype and it proved quite effective. Working with Mars Rising Network, she had the invention refined to prepare this essential new design into a commercial product. She is actively seeking a company that would have an interest in partnering with her to get this product on the market.
