Gentle Hoist

Introducing the

Gentle Hoist

“A welcome helper for child care needs”

TARGET MARKET:

- Families with infants.
- Those with disabilities or physical constraints

FEATURES:

- Easy to use
- Lightweight
- Push button powered

PATENT INFORMATION:

A provisional patent application was filed in October of 2020 and is in patent pending status.

SUMMARY:

Taking care of children is one of the most challenging yet rewarding parts of life. And in many family's lives that includes not only the parents' care, but also care by grandparents and other family members who may have more time to be involved in child care and babysitting.

This presents an extra challenge, the physical kind, handling an infant safely and easily, which for some of us with disabilities or physical weaknesses doesn't come so easily!

But with the **Gentle Hoist** this changes!

The **Gentle Hoist** is an easy solution to the physical difficult of changing diapers, a huge part of child care if you ask any parent or child care professional! This device allows the child to be lifted by a simple, light weight, and easy to install pulley that is push button powered. Just lay the infant's legs into the comfortable soft padded foot holders, secure the cuff and raise the baby's legs up gently and safely.

Now grandparents and family members won't have to stress about physically lifting and hold the child up while removing a messy diaper! Disabled family members with reduced use of function of hands or arms won't have to worry about this complex and messy child routine! And parents will feel at ease knowing that their baby can be cleaned and diapered by almost anyone.

Child care is important and parent's shouldn't have to do it alone, and family members should feel confident in care measures so they can enjoy the benefits of being around their grandchildren and nieces. The **Gentle Hoist** is the simple solution to the messiest child care need!

About the Developers

Andrew Rayborn of Otsego, MI, knows well of the difficulties of helping with the family duties if you are physically limited. Having a disability himself he wasn't going to let that stop him. He worked up a solution that would enable him and people like him and it proved to be quite effective. Working with Mars Rising Network, he had the invention refined to prepare this essential new design into a commercial product. He is actively seeking a company that would have an interest in partnering with him to get this product on the market.
