

Introducing The Spacial Audio System

“Clear Channels Representing Each Instrument”

TARGET MARKET:

- Audiophiles
- All Music Lovers

FEATURES:

- Convenient method for connection
- Unique sound from each set of speakers
- Can be used with different sets/brands

PATENT INFORMATION:

A patent has been applied for and is in patent pending status.

SUMMARY:

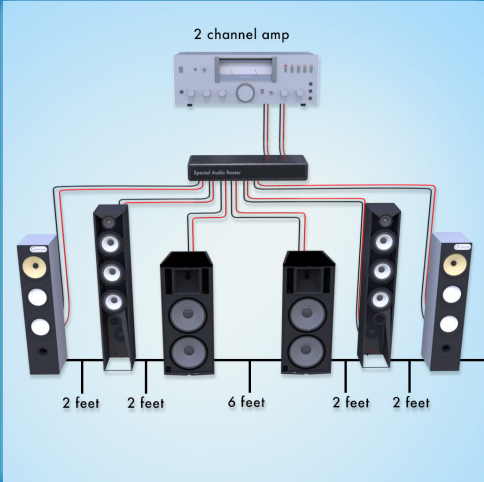

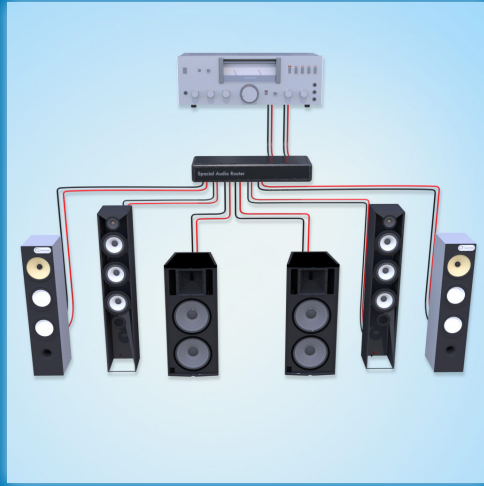

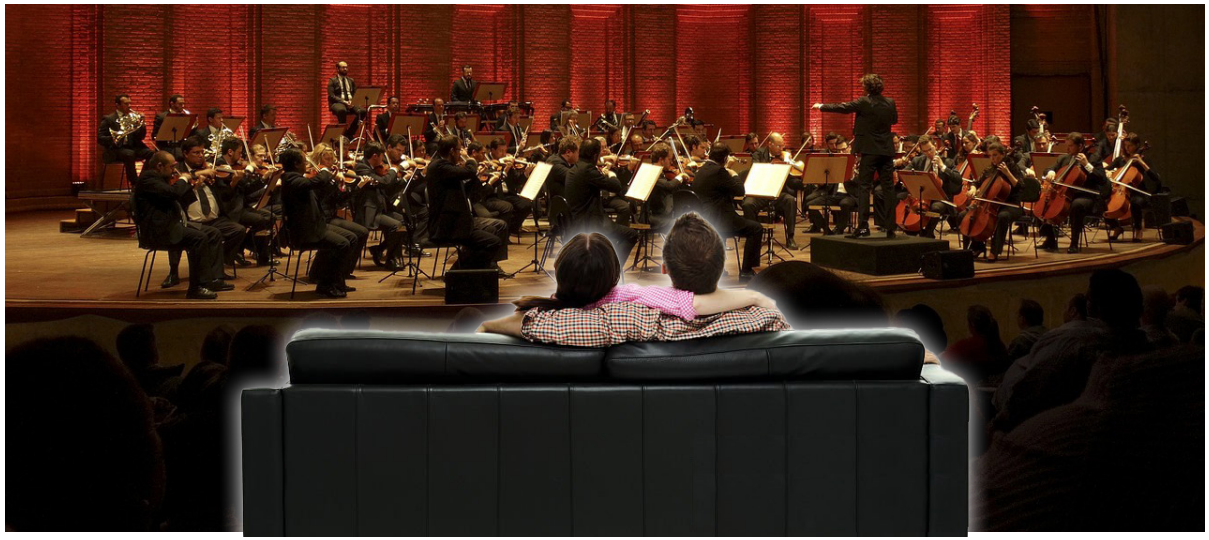

While sound has become better and clearer, there is one area that hasn't improved in years. Being able to differentiate clear channels representing each instrument has required it be done in production in a recording studio.

Introducing the Spacial Audio System!

You simply insert this device into your wiring setup. It can be used with mixed sets of branded speakers. Once completed, instruments will appear to be unique from each speaker, bass from one speaker, vocals from another.

The system is scalable and can be used with 4 or even 6 speakers.

The **Spacial Audio System** may be the biggest advance for audiophiles in years! It sounds like you are there!

Unique sound from each speaker.

See how it works!

About the Developer

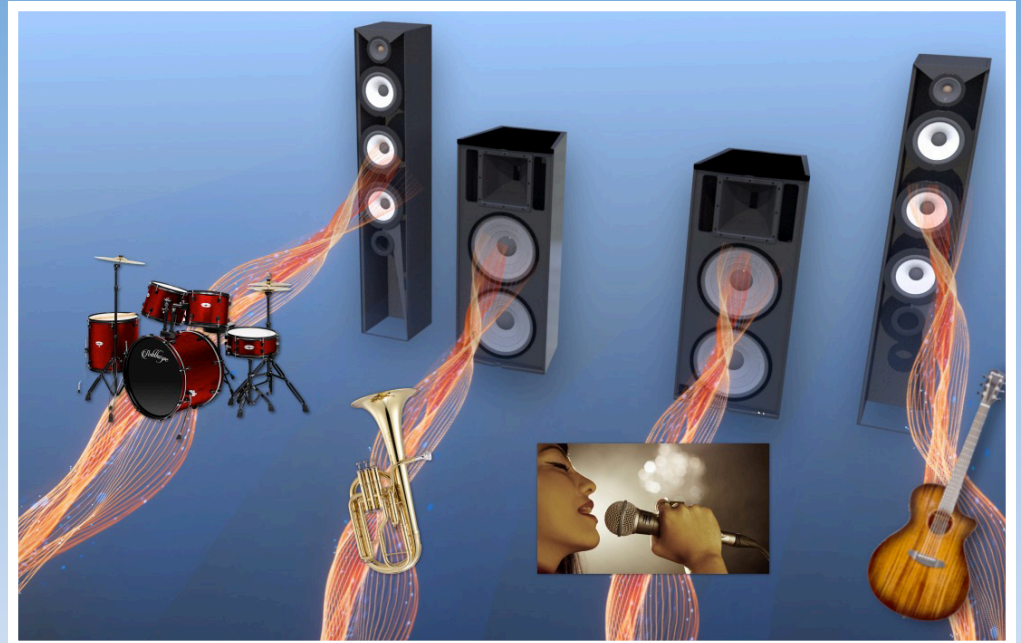

Robert Leach of Catlettsburg, KY is an inventor and is always looking to improve the things in our everyday life. Also being a music enthusiast he discovered a way to improve music drastically. He developed a solution and working with Mars Rising Network, he had the invention refined to prepare this essential new design into a commercial product. He is actively seeking a company that would have an interest in partnering with him to get this product on the market.
