Diaper N Dash

Introducing

Diaper N Dash

"A revolutionary device for parents on the move!"

TARGET MARKET:

- Young parents
- Travelers

FEATURES:

- Solid platform
- Maneuverable
- Portable and removable

PATENT INFORMATION:

Patent pending.

SUMMARY:

Diaper N Dash is a groundbreaking invention that removes the chaos of changing a baby's diaper in the car. Most parents know that changing a diaper in a vehicle is a Circus act. With Diaper N Dash, you can throw away the mess and the hassle. The product has innovative parts that complement each other: a portable platform that acts as a stable bed, and an arm made from unbreakable plastic anchored into the striker of a door frame on a vehicle.

What makes the Diaper N Dash stable is the signature Hook design. The Hook is inserted into the stryker thus locking the plat-

form, enabling it to hold the baby. In addition, Diaper N Dash includes a belt that holds the baby while you change the diaper. Concerning diapers and wipes, Diaper N Dash has a brand of diapers and wipes that works well with our product. So don't let traveling hinder your family. Let Diaper N Dash take care of your precious ones.

About the Developer

John Downing from Madison, MS, developed an ingenious process to change a baby diaper while traveling on road. John contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product. He actively seeking a company that would have an interest in partnering with him to get this patent pending product into the marketplace.
