Head Superiors

“Learn how to use hierarchy to value everyone.”

TARGET MARKET:

- Homes
- Businesses

SOME FEATURES:

- King of Kings and Lord of Lords
- L President Ta
- Law Officer Superior
- Employee
- Prime Director

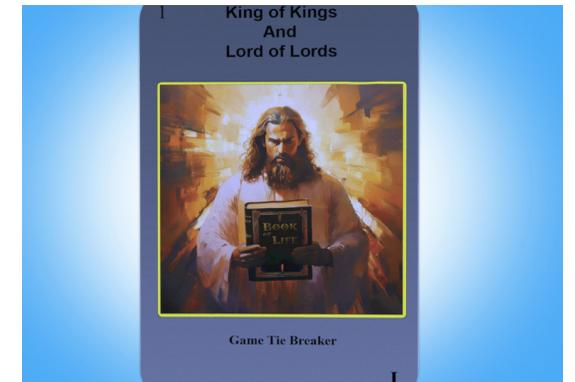

PATENT INFORMATION:

Patent pending.

SUMMARY:

Head Superiors© is a card game with 24 cards to represent people with different levels of power based on their position in business or life. As players lay cards for each round of play, their ability to take a hand is based on a card's rank of power, position, and special rules that define varying levels of power based upon influence. The object of the game is to end up with the most cards.

The game is meant to show that lower-ranking people can have great influence on the

most powerful through their knowledge, good intentions, and service in business and life. The top-ranking King of Kings card is meant to show that Jesus wants people of high positions to study and understand others of lower positions to make everyone feel valued.

About the Developer

Josh Hochstedler from Delaware, Ohio, came up with his invention so people could learn to use hierarchy to value others. Josh contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product.
