# Umbrella Ware

## Introducing

# Umbrella Ware

“A companion for every Scrabble players.”

### TARGET MARKET:

- Board game players
- Outdoor decks and Poolside patio table owners

### FEATURES:

- Female connector design
- Male connector design
- Permanent magnets

### PATENT INFORMATION:

Patent pending.

### SUMMARY:

The Umbrella Ware pole system allows for various system devices to be connected to and rotated manually around the pole while resting on the table surface. The system design allows for the installation and removal of system gaming boards, food service trays, and container holders without having to remove the pole. The devices can be rotated 360 degrees around the pole, counterclockwise or clockwise. The system features two (2) halves: one with a female connector design and one with a male connector design. The connectors utilize permanent magnets to attract and hold the two halves together with tensile strength. The magnets are embedded in the male

halves of the rectangular-shaped insertion pins as well as in the female halves of the rectangular-shaped receptacle cavities. This mechanical connection provides the sheer strength required while rotating the connected devices around the pole.

The halves can easily be separated with modest force. The male halves of the system provide the hooking mechanism for typical umbrella pole diameters (1.5 in. +/- 0.25 in. nominal diameter). This half can be as simple as a U-shaped hook or a utility-sized circular or rectangular tray of various sizes for game parts, food, and drink holders. The female halves can also be of various sizes and shapes for carrying gaming boards and gaming components, as well as food service trays and container holders. The male and female halves are not required to be of matching dimensions except at the connector.

**About the Developer**

Michael Hewett from Orondo, WA, thought about creating the Umbrella Ware while playing Scrabble with his wife. Michael contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product. He actively seeking a company that would have an interest in partnering with him to get this patent pending product into the marketplace.
