

Introducing

The Lazy Jane

“A perfect companion for growers of all levels.”

TARGET MARKET:

- Indoor Cannabis growers
- Indoor Gardeners

FEATURES:

- Angle front spill drainage
- Adjustable legs
- Integrated ScrOG net
- 360° multi pot base

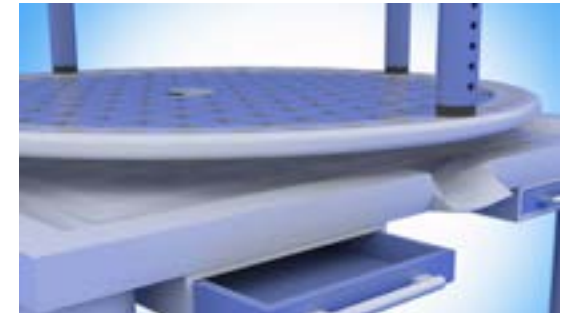

PATENT INFORMATION:

Patent pending.

SUMMARY:

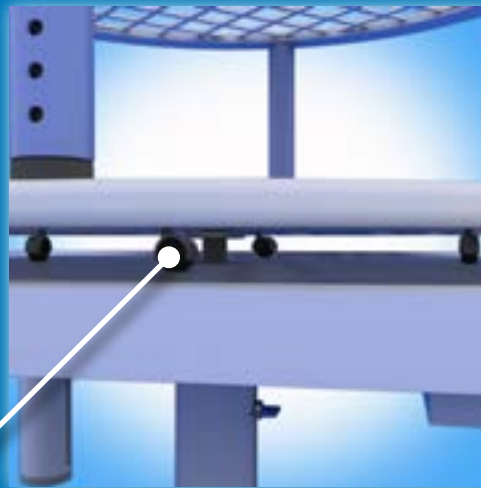

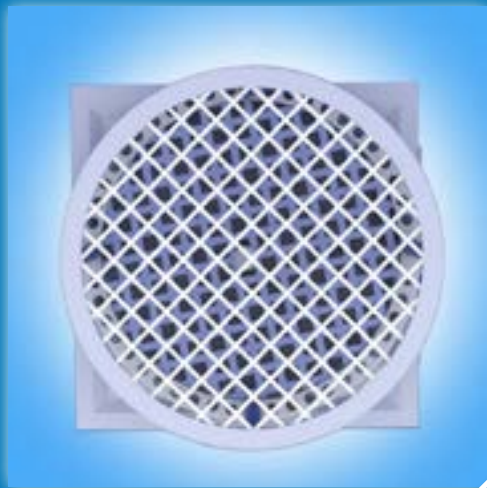

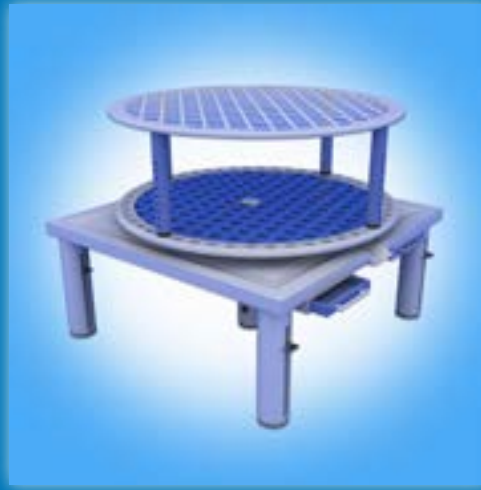

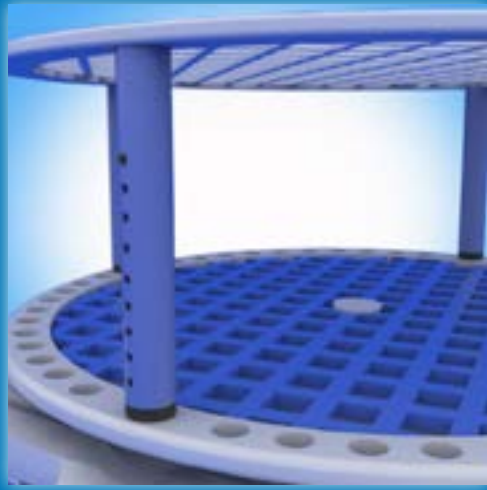

Introducing the Lazy Jane, a revolutionary addition to your home cannabis cultivation setup. This purpose-built Lazy Susan table is meticulously designed for use in cannabis tents, providing growers with unparalleled convenience and precision.

The Lazy Jane transforms the way you care for your plants by offering 360-degree spin functionality, effortlessly bringing each plant in front of the gardener. No more stretching or reaching—with Lazy Jane, every corner of your cannabis tent is within easy reach. The table's smooth rotation ensures a hassle-free gardening experience.

But that's not all; Lazy Jane goes beyond convenience by featuring an integrated SCROG net option, allowing growers to achieve an even canopy of growth. This added feature empowers growers to optimize light distribution and promote uniform plant development. There is no more concern about your plant being locked in place as she reaches through your netting. Just give the table a spin, and you can reach all sides.

Crafted with durability in mind, Lazy Jane is the perfect companion for growers of all levels. Elevate your cultivation game, streamline your workflow, and ensure your plants receive the care they deserve. Experience the future of home cannabis growing with Lazy Jane, where innovation meets simplicity for a greener tomorrow.

About the Developer

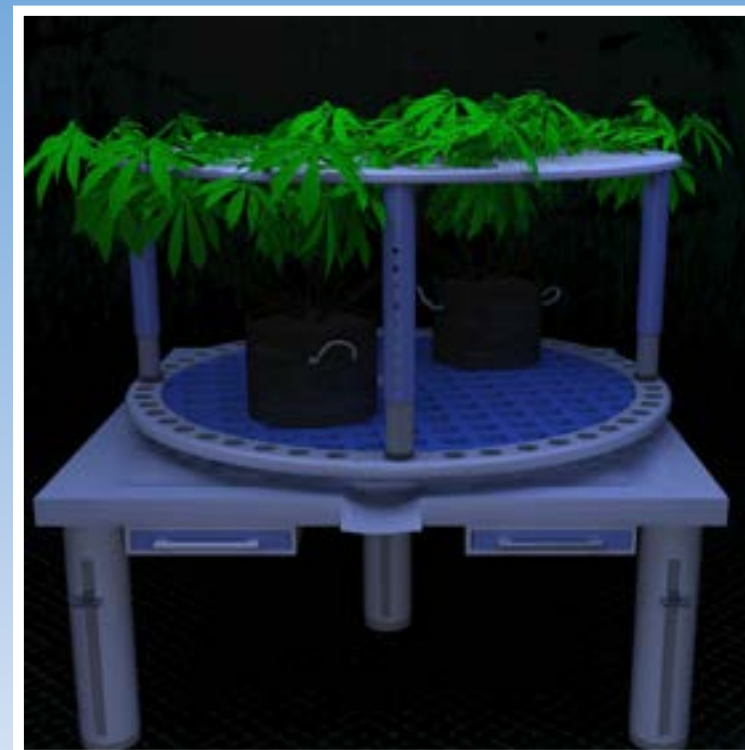

Michael Montaruli from Jefferson, MA, came up with the LazyJane concept years ago while tending to his own plants. Through the years, many improvements have been added as he thought of ways to make the growing process easier. Improvements such as removable upper ScrOG net for light stem training, adjustable legs on both lower table and upper ScrOG Netting and a channeled drainage outlet. Michael contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product. He actively seeking a company that would have an interest in partnering with him to get this patent pending product into the marketplace.
