An integrated soap pump system built into the wrist dispenses soap easily.

The “Wash My Dog” Gloves

Introducing the

“Wash My Dog” Gloves

Make dog washing a simple process!

TARGET MARKET:

- Pet owners
- Pet grooming businesses
- Veterinarians

FEATURES:

- Simple to use and refill.
- Keeps hands soap-free.
- Allows all-in-one operation.

PATENT INFORMATION

A provisional patent application was filed in March of 2019. The Mars Rising Network performed the patent search and concluded there is nothing similar to this product on the market, which means this unique device could be patented and used everywhere.

SUMMARY

Nearly all dog owners have faced the unenviable task of giving a rambunctious pup a bath.

Wash My Dog gloves offer an inexpensive, simple solution to the main reason owners – and dogs – dread bath time. Whenever you reach for the soap or brush, your dog wiggles and fidgets until it frees itself. The dog can begin splashing, run off and create a big

mess; not to mention a lot of wasted time and effort. When you’re wearing Wash My Dog gloves, you’ll have full control over your dog until the bath is finished.

Wash My Dog gloves are water-resistant rubber gloves that run halfway up your forearms when worn, and feature textured pads at each fingertip and palm that allow you to really work the soap into your dog’s fur and get a fantastic lather going. The main feature is an integrated soap pump system built into the wrist that dispenses soap easily. This means there’s no more taking attention off your dog to grab the soap. Simply press the air bladder button on the palm with your fingers, and the soap is pumped out onto the dog. Then you can wash your dog without interruption or risk of it slipping from your grip. Your dog will be cleaner and more refreshed after each washing.

Wash My Dog gloves transform the act of giving your dog a bath from a stressful chore into a fun, playful experience. Stop wasting time and soap, and get a pair of **Wash My Dog** gloves for the next time your pup gets into the mud.

About the Developer

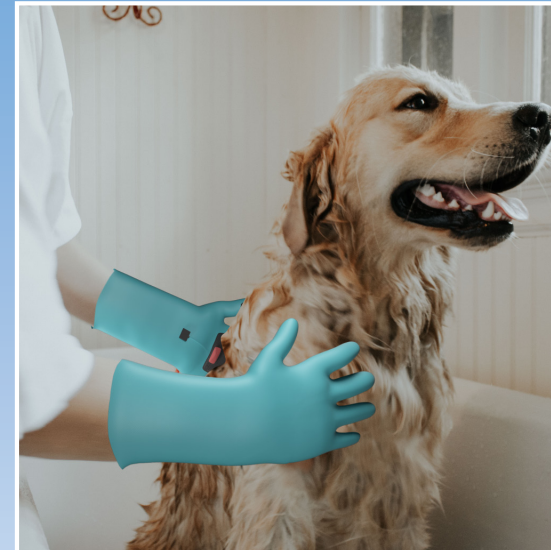

Carlos Jauregui of Los Angeles, CA has experienced what pretty much all dog owners have, the chaos and the resulting mess from washing your dog. Doggie bath time was usually an adventure, because if your dog didn't want a bath he would wait until you took your hands off of him and then make his getaway. So Carlos came up with a solution that keeps everything in order. He put together a prototype, contacted the Mars Rising Network and had a provisional patent application filed. Working with Mars Rising Network, he had the invention designed with the hope of turning this great idea into a real product. He is actively seeking a company that would have an interest in partnering with him, to get this product on the market.
