

“Sleep Dream Machine”

The Sleep Dream Machine is a one of a kind Audio/Video/Scent device Sleep Better – Scents from the Image – Animated Display – Relaxation

The Dream Machine is a versatile device for relaxation and to immerse yourself into a place you want to be. The device is created to allow you to dock it on a charging station and keep it in your home or take it anywhere you go as it carries a full charge when unmounted from the dock. It's a simple, but unique idea which starts with a general frame and docking station. The frame has a nice sized screen where animations/videos can play or still images if you wish. Typically, people like to immerse themselves in an area like the beach, city rain, the ocean, a snowy mountain, etc. This device was invented based on those ideas.

For instance: Add an animated image to the screen, then you can hear the natural sounds which would be heard in that area playing from the device as well. Furthermore; to immerse yourself there are two scent diffusers, one on each side at the top, which you can put a scent pod into and it will fill your room with the aroma of the place you have chosen. It has been proven that smell, sounds, and images can all take you back to a place in time within seconds and with this device you can easily relive those times.

There are other features with the device which makes it more user friendly as well. Such as: Buttons to turn it off/on, a dimmer switch, timer in case you want it to only be on for a certain duration of time, high quality speakers and an audio jack in case you want to take it on the go and listen to it privately. If you truly want to relax and take yourself away for a bit then you need the Dream Machine for that fully immersive experience. This product would be low cost on the retail shelf and could sell in any big box, and specialty, stores making it a high-volume sales product.

The inventor, Cindy Loveall, lives in Madison Indiana and had an idea for a better way to sleep and relax. Cindy contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that she may see success with this great idea and turn it into a real product. She is actively seeking a company that would have an interest in licensing the product for a royalty.

Patent Ability & Engineering

A provisional and design patent application has been filed as of March 2017. The Patent Search was performed by The Mars Rising Network and revealed nothing similar and that a granted patent could be obtained because of the unique design and functionality of the device as compared to other known devices.

The Market

The Domestic Market is very large to say the least. This product would sell in approximately 150,000 retail stores in the USA and throughout the international market.

The retail price would be from \$19.99 to \$149.99. The wholesale amount would be from \$9.00 to \$74.00 and the cost to manufacture would be from \$4.00 to \$44.00. The costs are an estimate of course ranging from USA or overseas manufacturing and distribution.

If you have an interest in more information regarding the Sleep Dream Machine and are a serious company that would be interested in a licensing agreement or distribution please contact me directly.

Sincerely;

Cindy Loveall / Inventor / Patent Holder
