

## Introducing the

# Tile Mud Spreader™

“For Mud Set Installations”

### TARGET MARKET:

- Installers of today's larger tiles.
- Anyone looking to use the most efficient tool for working with mud.

### FEATURES:

- Perfect sized notches for today's mud
- Inexpensive and easy to manufacture

### PATENT INFORMATION

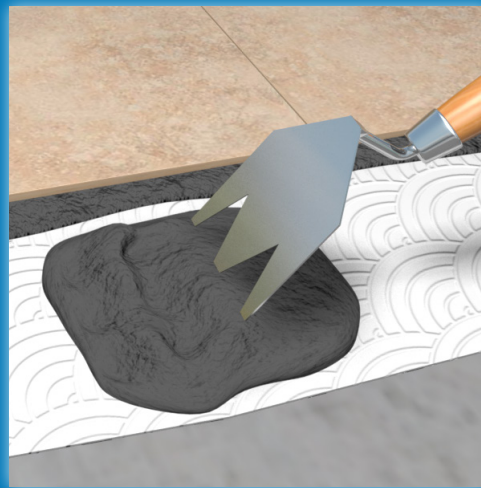

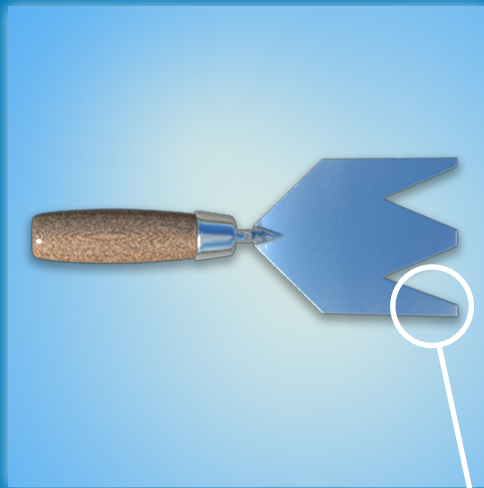

A provisional and design patent application has been filed as of August 2017. The patent search was performed by The Mars Rising Network. It was concluded that there is nothing similar to this product on the market, which means this unique, energy efficient device could be patented and brought into people's homes.

### SUMMARY

The Tile Mud Spreader™ is a new prospected invention that is being proposed by inventor Mario Rodriguez. Mr. Rodriguez, has been in the tiling business for many years and is using his experience and knowledgeable about tiling to develop a more efficient tool. Such as the most effective way to tile, how to

best apply the mortar, or in this case listing what kind of tool may be needed to best do so most efficiently. The Tile Mud Spreader™ is that knowledge being put to use. The tool itself is a palette tool that has a W shaped spreading blade. Most floor tiling jobs nowadays are done on a mortar bed (mud-setting) because of larger tiles and smaller grout joints. The mortar allows more space between the slab and the tile so it can actually be leveled and the tile installed close together avoiding uneven application (Uneven heights). This device allows for a easy nice and even laying of the mortar for these tiles.

This new device is extremely marketable to anyone in the construction or tiling industry. As well as many people who want to perform do it yourself work around the house. This level of marketability is important for any kind of tool. Companies can even supply the tool in bulk to their workers, which could very easily assist in their work being done faster as well as more efficiently. Mr. Rodriguez has created a tool that is extremely useful and well designed. It is lightweight with a wooden handle and is very sturdy which is essential on any kind of construction or tiling job. This is definitely a tool that anyone can use and everyone knows that easy is efficient.

**About the Developer**

The inventor, Mario Rodriguez, lives in Miami Beach, FL and had an idea for a better tool for working with today's larger modern tiles. Mario contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for a royalty.
